

OEC Reprint Corrections

*****This document represents reprint corrections that have been made between the first printing and April 2003.**

Page xxxvii - Robert J. Schappert

Changed “Louege Park” to “College Park”.

Page 109 - Table 4-3

Changed Children numbers to “18 to 34 breaths/min”

Changed Infants numbers to “30 to 60 breaths/min”

Page 112 - Table 4-4

Changed Children numbers to “70 to 140 beats/min”

Changed Toddlers numbers to “90 to 150 beats/min”

Changed Newborns numbers to “120 to 160 beats/min”

Page 140 – Table 5-3

Changed Children numbers to “70 to 140”

Page 147 – Fig. 5-13

Fixed registration of numbers/lines.

Page 162 – Table 6-1

Changed Children numbers to “18 to 34 breaths/min”

Changed Infants numbers to “30 to 60 breaths/min”

Page 174 – Wilderness Tips – Added this text to end of box:

Wrapping the oxygen connective tubing around a chemical warmer near the point of entry to the nonbreathing mask reservoir can significantly warm the provided oxygen.

Page 198 – 2nd paragraph – first line

Changed “four” to “five”

Page 208 – 2nd paragraph – 4th line

Changed “will” to “may”

Page 211 – Table 7-10

Changed “Baseline” to “Reassess”

Page 213 – Unresponsive Patients box

Changed “Baseline” to “Reassess”

Page 216 – Table 7-12

Changed “Baseline” to “Reassess” in both places.

Changed “and SAMPLE History” to “, take SAMPLE history” in both places.

Page 217 – Responsive Trauma Patients/Focused History and Physical Exam box

Changed “Baseline” to “Reassess” in both places.

Changed “and SAMPLE History” to “, take SAMPLE history” in both places.

Page 222 – Table 7-13

Changed “Baseline” to “Reassess”

Page 223 – Responsive Medical Patients/Focused History and Physical Exam box

Changed “Baseline” to “Reassess”

Page 230 – Table 7-14

Changed “Baseline” to “Reassess”

Page 231 – Detailed Physical Exam box

Changed “Baseline” to “Reassess”

Page 246 – Assessment in Action, Number 6

Changed answer C to “any medic alert tags or tattoos.”

Changed answer D to “the suspicion that she was not following proper kitchen procedures.”

Page 247 – Unresponsive Patients box

Changed “Baseline” to “Reassess”

Page 247 – Responsive Trauma Patients/Focused History and Physical Exam box

Changed “Baseline Vital Signs, SAMPLE History” to “Reassess Vital Signs, take SAMPLE History” in both places.

Page 247 – Responsive Medical Patients/Focused History and Physical Exam box

Changed “Baseline” to “Reassess”

Page 247 – Detailed Physical Exam box

Changed “Baseline” to “Reassess”

Page 254 – Rescuer Safety box

Changed “Safety” to “Tips” and update design to be Rescuer Tips box design.

Page 255 – Fig. 8-7

Made blood in A lighter than B, but darker than C. Blood in B must be darkest. Blood in C must be brightest.

Page 257 – Fig. 8-8

Moved brachial pulse higher.

Page 263 – First paragraph

Changed “shim” to “sheave.”

Page 266 – First sentence

Capitalized “sidewinder.”

Page 272 – Skill Drill 9-1, photo 5

Updated caption to read “If fractures are splinted and stabilized, elevate the legs 6” to 12” as long as the injury is not compromised.”

Page 273 – number 5

Updated to read “After splinting and stabilizing any fractures, elevate the lower extremities 6” to 12” with attention to the spine if the mechanism suggests possible spinal injury. If the fractured limb cannot be raised without compromising the injury, raise the uninjured limb. This slows venous bleeding in an extremity and allows blood in the legs to return to the heart more rapidly (Step 5).”

Page 279 – Assessment in Action, Number 7

Changed answer A to “Applying traction splints to both femur fractures”

Page 303– Assessment in Action, Number 8

Changed “En route to the hospital” to “After arriving at the aid room”

Page 303 – Points to Ponder – changed to the following:

You are returning to the patrol hut when you hear the dispatch for a drowning at the lodge pool. You rush to the scene and arrive as a pool attendant hands out a 10-year-old child. The child is cyanotic and unresponsive. You find a pulse but no breathing. A fellow patroller has a child about the same age and is shaken by this call. Just before the ambulance arrives, the child “crashes” and loses a pulse. Even with a concerted effort of all involved, the child dies. After the incident you notice that the other patroller is barely functioning and you even have visions of the child when you close your eyes. As time drags on, you and the other patroller delay your return to the patrol hut. Would you stay on duty? What would you do to help your partner? What would you do to help yourself?”

Page 309 – Fig. 11-5

In caption, deleted “oxygen-rich”

Page 309 – Fig. 11-6

In caption, deleted “which pumps it through the lungs for oxygenation”

Page 313 – second to last paragraph – 6th line down

Changed “(ALS)” to “(ACLS)”

Next paragraph – first and 4th lines:

Changed “ALS” to “ACLS”

Page 314 –

Updated left column title to “More about cardiogenic shock”

Right column – Deleted #5 and renumber #6 to #5.

Page 315 – left column

Changed “ALS” to “ACLS” in all four instances.

Page 316 – first line

Changed “ALS” to “ACLS”

Page 320 – second column, first line

Changed “ALS” to “ACLS”

Page 330

Deleted #5 and #10. Renumbered the rest.

Page 334 – You are the rescuer

Changed question 2 to “How does a rescuer assess the patient with neurological dysfunction and what is the importance of early intervention and rapid transport?”

Page 349 – first sentence

Changed “57-year-old” to “middle-aged”

Page 363 – 2nd column, 2nd paragraph, 11th line

Changed “you” to “OEC technicians”

Page 376

Moved reference for Fig. 13-23 to end of next sentence.

Page 377

Italicized “Coelenterates” in both places.

Page 402

Changed box to Rescuer Tips box.

Page 404 – first column, 2nd paragraph, 7th line down, and also Fig. 14-9 caption

Changed spelling of randonne to randonné.

Page 405 – pull quote

Changed “Stop” to “Do not stop”

Page 407- Table 14-4

Number 8 – changed “skiing” to enjoying outdoor sports.

Number 9 – changed “skiing” to engaging in outdoor recreation.

Number 14 – changed to “Follow “Your Responsibility Code”” etc.

Number 16 – Changed “ski poles” to “other protective equipment”

Page 408 – 2nd paragraph

Changed first sentence to: “Snowmobiles are rugged machines, though under certain maneuvers and conditions, they can be unstable.”

Page 411 – Points to Ponder

2nd sentence - changed “inside” to “outside”

4th sentence – changed “in” to “out”

Page 417

Changed header “Severity of Hypothermia” to “Causes of Hypothermia”

Page 421 - 2nd column, 2nd line

After electric blanket, added “and electric mattress pads”

Page 423 – 2nd column, end of 1st paragraph

Changed “become gangrenous” to “die”

Page 427

Deleted “Signs and Symptoms of” from header and changed it to B head (blue).

Also made next header (HAPE) a B-head (blue).

Page 430 – 1st column, 3rd paragraph, 15th line

Added “1789 (avobenzone)” after Parsol.

Page 441

Made “Avalanche Injuries” header and A-head.

Page 448 – Number 4

Changed to “The fatality rate for lightning strikes is about:

- A. 20%
- B. 30%
- C. 50%
- D. 70%”

Page 459 – Assessment in Action, Number 8

Changed to “When documenting patient care for an....”

Page 467 – 2nd column, last sentence before #1

Changed to “The following text describes the procedure in more detail:”

Page 470 – right before Postdelivery Care

Italicized “vernix caseosa”

Page 477 – Number 4

Changed to:

“4. Give oxygen. Direct a stream of oxygen in a small tent over the infant’s head; you can use a blanket or a piece of aluminum foil to make the tent. Do not direct the oxygen

into the infant's mouth or face. Although there is some danger to a premature infant from receiving ...”

Page 481 – Points to Ponder

Changed “Jehovah’s witnesses” to “devoutly religious”

Page 497 - Assessment in Action – changed to:

“A skier was traveling down a trail at a high rate of speed when he lost control, fell, and slammed into a tree. He rebounded back onto the trail and continued to slide partway down the slope. Upon your arrival, you find him on his back, complaining of pain in his hip. His skis came off as a result of the collision with the tree and at this time, he is alert and responsive.”

Page 507 – Skill Drill 19-1 – photo 2.

Added 2nd sentence to caption, “Elevate an extremity to slow circulation, which helps control bleeding.”

Page 519 – Wilderness Tip box

Added “, page 881,” after “Appendix D”.

Page 520 – Ready for Review, 2nd paragraph, 8th line

Added sentence after the sentence that ends “...control bleeding.”

“Direct pressure, extremity elevation, and pressure points are techniques that are used to control bleeding.”

Page 521 – Assessment in Action – 2nd paragraph, 4th line down

Changed “creak edge” to “tree trunk”

Page 521 – Assessment in Action – Number 4

Changed first phrase in question to “Even as the patient recovers from the immediate effects of his injuries,”

Page 524 – You Are the Rescuer – changed 1st paragraph to:

“Patrollers are called to the top of Chair 4 where a lift mechanic has experienced eye injuries while repairing a sheave.”

Page 530

Space in vocab term “snow blindness” was deleted.

Page 534 – Vital Vocabulary

Space in vocab term “snow blindness” was deleted.

Page 559 – Points to Ponder

Before “Issues,” added “What should you do at this point?”

Page 565 – Wilderness Tips box

Changed to Rescuer Tips box.

Page 578 – Fig. 24-3

In Hinge Motion category, fixed elbow joint image to be the same elbow joint image shown in AAOS Fig. 29-5.

Page 590

Deleted “Rigid” from header “Rigid Fixation Splints”

Page 593 - End of page – item #1

Rephrased to: “**1. Open a blanket on a flat surface,...**”

Page 594 – Number 2

Rephrased to “**2. Lay two or three cravats across the blanket....**”

Page 602 – Number 8 – 4th line down

Rephrased to “the patient to definitive care (**Step 7**).”

Page 618 – Table 25-1

Changed “Treatment” header to “Emergency Care”

Page 630 – 2nd column

5th line down - Changed to “medial collateral ligament or MCL, is torn more”
4th full paragraph – 5th line down – Deleted “joint” after “MCL”.

Page 653 – Skill Drill 26-1, number 4

Changed “your partner” to “another rescuer”

Page 653 – header “Stabilization of the Cervical Spine”

Changed “Stabilization” to “Stabilizing”

Page 656 - Number 10

Changed end of last sentence to “To prevent airway problems and leave access, do not tape over the throat (**Step 9**).”

Page 656 – 2nd column - 5th line down under Sitting Patients

Changed “should” to “may”

Page 657 – Number 9

Changed “head” to “chin”

Page 668 – Last sentence on page

Changed to “Consult local protocols regarding helmet removal. When you decide to remove a helmet, follow the steps in **Skill Drill 26-5**.”

Page 678

Number 11 - Changed "Scoop" to "Scoop stretcher"
Number 13 – Deleted "Portable stretcher"

Page 683 – Fig. 27-3

Changed 2nd line to "Roll the patient onto his or her side ..."
After C, changed to "The patient's lower arm should be extended and the upper hand placed under the cheek."

Page 684 – 2nd paragraph, 2nd sentence

Changed to "Straighten the patient's near arm and place it outstretched above the head. This is to support the patient's head and neck in a near-anatomically neutral position as the patient is rolled."

Page 692 - 2nd column, 2nd bullet

Added "P" to "lace"

Page 714 – You are the rescuer

Deleted question 1 and renumbered the rest.

Page 716

3rd bullet on page – changed "more" to "less"
4th bullet on page – changed "less" to "more"

Page 755

Deleted "Medical" from header "Emergency Medical Care"

Page 780 – 2nd column, 2nd to last paragraph

Updated last sentence to "Look for a medical alert tag such as a bracelet, and treat seizures appropriately."

Page 917

Added "Blisters, 888" to index

Page 920

Added "CPR. *See* Cardiopulmonary resuscitation."

Page 924

Deleted "Heatpac, 420"

Page 926

Added "Jewelry removal, 889"

Page 934

Added "Subungual hematoma, 889"
